

**Step 1:** Download the Expit Registered Plugin from <https://registeremail.expit.com>

**Step 2:** Add MetaMask to your preferred browser to create Ethereum Account and Add test ethers

- Using Chrome:
  1. Go to <https://chrome.google.com/webstore/detail/metamask/nkbihfbeogaeaoehlefnkodbefgpgknn>
  2. Click "Add to Chrome".
  3. Confirm by clicking "Add Extension".
  4. After installation, click on the fox icon at the upper right side of the Chrome Browser.
  5. Scroll down to read the terms and conditions and then click "Accept".
  6. Create a new password and click "Create".
  7. You have now an Ethereum account.
  8. Choose your Ethereum network by clicking on the "Main Network" dropdown.
  9. "EXPIT Registered Email" works on "ROPSTEN Test Network".
- Using Firefox:
  1. Go to <https://addons.mozilla.org/en-US/firefox/addon/ether-metamask/>
  2. Click "Add to Firefox".
  3. Confirm by clicking "Add".
  4. After installation, click on the fox icon.
  5. Scroll down to read the terms and conditions and then click "Accept".
  6. Create a new password and click "Create".
  7. You have now an Ethereum account.
  8. Choose your Ethereum network by clicking on the "Main Network" dropdown.
  9. "EXPIT Registered Email" works on "ROPSTEN Test Network".
- To copy your account:
  - Open MetaMask.
  - Enter password if needed
  - Click on the 3 dots, a menu will appear.
  - Click "Copy Address to clipboard".
  - Open Outlook
  - Inside EXPIT plugin click "Settings".
  - Paste your public address in "Public Address".
- To export the private key:
  - Open MetaMask.
  - Enter password if needed
  - Click on the 3 dots, a menu will appear.
  - Click "Export Private Key".
  - Enter the password you used while creating the vault.
  - Click "Submit".
  - Choose either of the available options to export your private key (Click to Copy the private key to use in Outlook).
  - Open Outlook
  - Inside EXPIT plugin click "Settings".
  - Paste your private key in "Private Key".

- To add test ethers:
  - Open MetaMask.
  - Enter password if needed
  - Click “Buy”.
  - A web page will open.
  - Keep clicking on the green button “request 1 ether from faucet” until you have the max number you can get.
- A helpful video by MetaMask: [https://www.youtube.com/watch?v=6Gf\\_kRE4MJU](https://www.youtube.com/watch?v=6Gf_kRE4MJU)

**Step 3:** Start the installation process by running the EXE.

**Step 4:** Start using Expit Registered Email to safeguard your communication. You need to open the app “Settings” in order to fill down the needed information (Ethereum Public Address, Private key, Network...etc.)
